

In 2016, Naoyuki Okada joined the Chromosome Instability and Dynamics Lab as a postdoctoral researcher. In 2014-2016, he worked as a postdoctoral fellow with his PhD supervisor, Masamitsu Sato at Waseda University. He got his PhD in Molecular Biology at Faculty of Science in University of Tokyo, Japan in 2014. During his PhD, he worked on microtubule reorganization during the cell cycle using fission yeast as a model organism. He completed his master degree in molecular biology at university of Tokyo, Japan in 2011.
