- Each table should have a title.
- The text should include reference to all tables. Use Table followed by the number in the text, not an abbreviation.
- Tables should be included in the text at the right place.
- Tables should be clear without reading the text. Column headings should be brief and clear.
- Any necessary explanations essential for understanding the table should be given as a footnote at the bottom of the table. Use either numbers or letters for footnotes.

Formulae and equations

- Formulae should be typewritten, if possible.
- Subscripts and superscripts should be clear.
- Give the meaning of all symbols immediately after the equation in which they are first used.
- Equations should be numbered in Arabic numbers serially at the right-hand side in parentheses.
- When referring to equations in the text use Equation followed by the number, not Eq.

Illustrations

- All illustrations should be black and white (coloured illustrations can not be accepted). Full colour illustrations will be converted to black & white.
- **Never** submit illustrations as PowerPoint files, with the exceptions of cladograms or as PDF.
- If photographs are necessary, submit original photographs with good contrast and intensity. Sharp and glossy copies are required. Reproductions of photographs already printed can not be accepted.
- Resolution of photos and pictures should be at least 300 dpi. For line drawings use at least 900 dpi.

- Each illustration should have a title. Type this title in the text where the illustration should be placed.
- Any necessary explanations essential for understanding the figure should be given as a footnote at the bottom of the table. Use either numbers or letters for footnotes.

- Work accepted for publication, but not yet published or first published online should be referred to as 'in press'.
- In the text, refer to the author's name (without initials) and year of publication. Publications from the same authors in a single year should use a, b, etc.
- If reference is made to a publication written by more than two authors, the name of the first author should be followed by '*et al.*'. Use 'and' and not '&' for two authors.
- References without an author should be referred as Anonymous.
- References cited together in the text should be arranged alphabetically.
- All publications cited in the text should be presented in an alphabetical list of references at the end of the manuscript (no numbering).
- The list of references should be arranged alphabetically by authors' names, and chronologically per author.
- All authors of each article should be mentioned in the reference list. Institutional authors, like World Health Organisation (WHO) or United States Department of Agriculture (USDA), should be written out in the reference list.
