

PhD Training SERIES

12H IBMC Auditorium

APRIL 11

Cyclic nucleotide activation in a bacterial potassium channel: studying the conformational change

João Pessoa, Structural Biochemistry

APRIL 18

Immunological study of clinical isolates of *Leishmania infantum* as vaccine model

Joana Cunha, Parasite Disease Group

MAY 16

***Listeria monocytogenes* wall teichoic acid rhamnosylation is required for virulence, resistance to host defenses, and surface protein anchoring**

Filipe Carvalho, Molecular Microbiology

MAY 30

Molecular mechanisms that control the expression of *Prrxl1* in nociceptive neurons

Isabel Regadas, Morphophysiology of the Somatosensory System

JUNE 13

The peripheral nervous system in transthyretin-related amyloidosis – molecular and functional studies

Nádia Sofia Pereira Gonçalves, Molecular Neurobiology

JUNE 27

Dynamics of cellular responses during visceral leishmaniasis on a non-human primate model of infection

Vasco Rodrigues, Parasite Disease Group
