

PhD Training SERIES

12H IBMC Auditorium

SEPT 12

Mechanistic insights into the peroxisomal matrix protein import pathway

Tânia Filipa Francisco, Organelle Biogenesis and Function

SEPT 26

Cooperation between antioxidants and antibiotics: the role of antioxidants on the production of secondary metabolites in *Streptomyces*

Tiago Beites, Cellular and Applied Microbiology

OCT 10

The PEX7 mediated import of peroxisomal matrix proteins

Tony Rodrigues, Organelle Biogenesis and Function

OCT 24

Guest diffusion in organic crystals

Joana Durão, Molecular Biophysics and Function

NOV 21

Intra-articular injection of collagenase as a model of nociception in osteoarthritis

Sara Adães, Morphophysiology of the Somatosensory System

5 DEC

Ribose 5-phosphate isomerase B and Asparagine synthetase A: novel potential drug targets against trypanosomatid diseases

Inês Loureiro, Parasite Disease

19 DEC

Mechanisms of action of botulinum toxin in the treatment of overactive bladder

Ana Cristina Pinto Coelho, Translational Neuro-Urology
