

### JAN 9 Listeria monocytogenes delays host cell cycle to promote infection Elsa Leitão, Molecular Microbiology

# FEB 6 Ether-phospholipid function on Schwann cell and oligodendrocyte differentiation Pedro Brites, Nerve Regeneration

#### FEB 20 How signalling affects Drosophila glia development Lígia Tavares, Glial Cell Biology

## MARCH 6 A functional interplay between TGF-β signalling and nucleolus during Drosophila development Torcato Martins, Developmental Biology

MARCH 20
Transthyretin neuroprotection in Alzheimer's disease: evidence from a transgenic mouse model
Marisa Oliveira, Molecular
Neurobiology

## APRIL 3 The diversity and ecological context of the LuxR regulators in Actinobacteria Catarina Santos, Cellular and Applied Microbiology
