

friday noon seminars

**WINTER
SERIES** | **12H IBMC
AUDITORIUM**

JANUARY 10

Spore and toxin production by the human intestinal pathogen *Clostridium difficile*

Adriano Henriques, Instituto de Tecnologia Química e Biológica, Universidade Nova de Lisboa, Portugal

JANUARY 17

Biology in 3D

Pedro Granja, NEWTherapies Group
INEB, Portugal

JANUARY 24

Inhibitomes in T cell signaling: the tails of the two towers

Alexandre de Carmo, CAGE, IBMC, Portugal

FEBRUARY 7

Treatment of Ischemia - related Bladder Overactivity

Karl-Erik Andersson, Institute for Regenerative Medicine, Wake Forest University, USA

FEBRUARY 14

Science in society and society in science: reflections on social responsibility in science.

George Gaskell, London School of Economics and Political Science, UK

FEBRUARY 21

Unique stress protectors in extremophiles: biosynthesis, physiological role and mode of action

Helena Santos, Instituto de Tecnologia Química e Biológica, Universidade Nova de Lisboa, Portugal

FEBRUARY 28

The making of a mitotic spindle with or without centrosomes

Fanni Gergely, Cancer Research UK
Cambridge Research Institute, University of Cambridge, UK

MARCH 7

Microtubule end binding proteins provide new insight into dynamic instability

Thomas Surrey, University College London, UK

MARCH 14

How to kill a mocking bug - Structural insights into Tc toxin complex action

Stefan Raunser, Max Planck Institute for Molecular Physiology, Dortmund, Germany

MARCH 28

Keeping mitochondria in shape: a matter of life, death and differentiation

Luca Scorrano, Venetian Institute of Molecular Medicine, Italy
