

IBMC - Instituto de Biologia Molecular e Celular

Research Technician Position (f/m)

Internal Code: Norte202016

Project: NORTE-01-0145-FEDER-00008, Porto Neurosciences and Neurologic Disease Research Initiative at I3S

Title: Research Technician Histology and Electron Microscopy Service (HEMS) platform

The research technician position is a term fixed contract for 9 months, expecting to start April 1st 2019. The salary is 1373,12 euros (with exclusivity) and regulated by the Portuguese Labor Law.

Duties to be performed: The general objectives of this research project are the consolidation of ongoing studies in the field of Cell Homeostasis Tissue Organization and Organism Biology and the development of new interface areas at i3S. This interdisciplinary project takes advantage of the knowledge and expertise of i3S research groups using different approaches in histology, including embedding and sectioning procedures, and chemical staining methods. Experience in electron microscopy will be an advantage. The successful applicant will provide support to the development of projects associated with Histology and Electron Microscopy Service (HEMS).

The work will be developed at Instituto de Investigação e Inovação em Saúde - i3S/HEMS platform, Porto, Portugal.

Selection Committee:

João Relvas, PhD,
Pedro Brites, PhD
Isabel Cardoso, PhD
Rui Fernandes

Applications are open from March 15th until March 23rd, 2019.

To apply for the Research Technician Position interested candidates must hold a Master degree in Biology, or related field and solid laboratory experience and histology techniques domain and electron microscopy, and submit the following documents a) Complete CV; b) Motivation Letter; and c) Referee Letter, *via* the online application system:

<http://www.ibmc.up.pt/gestaocandidaturas/index.php?codigo=Norte202016>
