

PHD TRAINING SERIES
12H IBMC AUDITORIUM

08 OCTOBER 2014

Study and application of propofol pharmacokinetics to target-controlled infusion in veterinary medicine

Sónia Campos, Laboratory Animal Science, IBMC

22 OCTOBER 2014

Functional Characterization of Prrxl1 Target Genes in Nociceptive System Development
César Monteiro, Morphophysiology of the Somatosensory System, IBMC

05 NOVEMBER 2014

Immobilization of the novel molinate hydrolase (MolA) towards a bioremediation process

Mafalda Paiva, Molecular Biophysics, IBMC

12 NOVEMBER 2014

Contextual determinants of healthy ageing

Ana Isabel Ribeiro, GeoEpidemiologia, INEB

19 NOVEMBER 2014

Lipid specific T cells in Fabry and Gaucher diseases

Cátia Pereira, Lysosome and Peroxisome Biology, IBMC

03 DECEMBER 2014

Lymphocytes in Hemochromatosis: a genomic and functional approach

Mónica Costa, Basic and Clinical Research on Iron Biology, IBMC

17 DECEMBER 2014

When a peroxidase moonlights as a chaperone: a tale of a protein essential for *Leishmania* infectivity

Filipa Teixeira, Molecular Parasitology, IBMC
