

## Bioinformatician (M/F)

Internal Reference: CGPP-BI-2014

The Centre for Predictive and Preventive Genetics (CGPP), a unit of the Institute for Molecular and Cell Biology (IBMC), is opening a position for a Bioinformatician with the following profile:

- Master degree in Informatics, Computer Science or related field of study
- Previous education/training in Bioinformatics, as well as in programming, required
- Background and good knowledge in Biology or related area highly recommended
- Preferably good knowledge and previous experience with online genomic databases and bioinformatics tools, including analysis of next-generation sequencing data, in particular genome assembly and annotation, variant detection (SNPs and indels) and structural variation
- Willing to dedicate entirely to and work in the environment of a diagnostics genetics laboratory, in (1) the analysis of raw data from next generation sequencing; and (2) helping in the programming of the laboratory patient and results databases

The position contract is for one year, which can eventually be renewed (as ruled by the Portuguese Labor Law).

The applications should be received from 24<sup>h</sup> October to 13 November 2014, and the expected starting date is 24 November 2014.

The proposals must include a letter of motivation, CV and 2 reference contacts, and must be submitted on the IBMC webpage:

<http://www.ibmc.up.pt/gestaocandidaturas/index.php?codigo=CGPP-BI-2014>

Results: the final results are announced at the IBMC site.
